CREATIVE LEARNING

Genesis

Association for Promotion of Creative Learning (APCL) was established in the year 1997-98 as a not-for-profit organization to promote creativity in the society. It is registered under Society Registration Act of 1860 at Bihar (India) vide registration No. 171 dated 31.3.1998.

Vision

It visualizes a world free from all discrimination where each individual is able to develop his/her full creative potential. It would be a learning society where,

- **Every occasion is a learning occasion**
- **Every place is a learning place**
- **Every person, animate object becomes a learning object, learning facilitator and learner**

Mission

- Universalisation of Quality Education
- Development of full Creative Potential of all human beings.
- Evolution of a Learning Society

Focus

Creativity has assumed great importance in the context of globalization and new economic order. It is creativity, which is going to make major difference in the social, economic and cultural status of different societies. Childhood is the main period for the development of creativity. If creative potential of a society has to be tapped, the main focus has to be on the development of creativity right from childhood. Further, focus on creativity would also be helpful in bringing equity in society as underprivileged section of society has a great untapped creative potential. This potential being properly recognized, nursed and developed can be a major tool of their empowerment.

Nature of activities

APCL strives to work for promoting creativity through following activities.

Research

Working relentlessly to find out new ways to develop creativity in persons of different age-groups and developing new pedagogy for creatively mainstreaming the underprivileged

Training

Working for capacity building and skill development of teachers, parents, educator- planners and other persons involved in promotion and dissemination of creative skills in society.

Demonstration and Extension

Creating awareness regarding use of teaching learning methods and materials for development of creativity and help people to learn throughout life and establishing institutions and networking with other institutions.

Association for Promotion of Creative Learning (APCL)

Association for Promotion of Creative Learning was established in 1997 as a Non-Profit/Non-Government organization to promote creativity in the society. APCL visualizes a world free from all discrimination, where each individual is able to develop their full creative potential. It would be a society where every person would realize their right to lead a dignified, healthy and creative life. Such society would be a learning society rooted to the principles of creativity, where every occasion is a learning occasion, every place is a learning place, every person and institution is a learning object, a learning facilitator and a learner.

APCL has been working in rural areas, particularly with members of scheduled castes (consisting of Chamar, Dhobi, Pasi, Paswan, etc.), and Muslims. Even among scheduled castes it has worked with Musahars - the most landless, houseless, illiterate and backward community of society. Its main focus is on school and out of school children. It also works with EBCs (Extremely Backward Castes) as EBCs are educationally backward. Some of them like Beldars are landless and agricultural labours and educationally their status is comparable to SCs.

As EBCs are mainly professionals or land cutting communities, there is large scale migration in them, this makes their children specially girls vulnerable who have to keep themselves engaged in household chores and baby-sitting and their education suffers.

APCL also works with the community to enhance their participation in education processes. It also works with the parents and community of those children. It has also worked for school going girls. APCL also works with children who are not performing well in examinations and performs home counselling. The organisation is also working with old women and destitute. APCL has developed vulnerability indicator for assessing vulnerability of a community and identified vulnerable groups in community.

School of Creative Learning

(Support: Own Resource and Beneficiary Contribution)

Objectives

- To provide quality education up to XIIth classes mostly belongs to BPL and excluded communities.
- To test innovative ideas of different tools of learning at grassroots level.
- To broach new ideas through implementations of developed ideas of creative learning.
- To develop managerial and other competencies through involving students in different activities within the school premises.
- To enhance democratic sense and moral value-based education to students.

What is Creative Learning?

SCL (School of Creative Learning) is affiliated to CBSE, New Delhi for 10+2 examination. It transacts CBSE curricula with Creative Learning Methodology.

After a long and painstaking research APCL has developed a new teaching/learning methodology called Creative Learning which aims at developing creativity of a person. It believes that every child is born creative. The basic purpose of any learning system should be to develop his/her intrinsic natural learning process.

Based on information processing model of learning, it attempts to develop seven basic competencies called Core Creative Competencies (C3) - Concentration, Power of observation, Memory, Thinking, Imagination, Emotional Management and Power of Expression/Communication.

While designing teaching learning materials and methods, it takes care of different learning styles of children based on the concept of multiple intelligence. It also takes into consideration the unique role of symbols and patterns in multiple intelligence frameworks.

The new TLM evolves from the traditional cultural practices, which have been found suitable to develop creativity in society since time immemorial. In this context it has integrated Yogic method of learning into the modern learning system.

Based on Yogic method of learning, APCL has developed unique *Visualization Exercises* to develop processes of *Mental Image Making*. These exercises help learners to develop power of concentration, memory, imagination and ability for faster mental mathematics. It further helps them to have better emotional control, which is now considered to be so vital for achieving success in life. The new TLM basically aims at preparing child to keep learning continuously from womb to tomb.

The content of learning is chosen taking consideration of the uniqueness of learning environment. It is selected to meet the needs of self, family and neighbourhood. Thus, it tries to develop a person not only as an individual, but also as a social being strengthening family ties and friendship bonds. Its activities are designed in such a fashion that it we should gradually reduce individual competition and enhance group cooperation. As emotions have been found to play an important role in the development of relationships and success of individuals, it is given due importance in the teaching learning process.

The new TLM has also developed a unique monitoring and evaluation system, which helps in understanding the strengths and weaknesses in the achievement of a learner. It also helps in diagnosing the actual problems in learning process so that appropriate and timely remedial measures may be applied.

The concept has been developed in the form of a book called *Creative Learning* (published by VIVA Books Ltd.). The first copy of the book was presented to HE Sri APJ Kalam in a presentation ceremony held at Rashtrapati Bhavan, New Delhi.

It has developed a unique teaching learning methodology, based on our age-old Indian learning system properly blended with modern learning technology, to promote Quality Education in society. It believes that the problems of our society in new millennium can be solved only by universalizing Quality Education.

The Context

Every child is unique. It has a natural style of learning which is not only dependent on his/her genetic disposition at birth, but is also affected by the environment of upbringing. When she/he goes to school she/he is subjected to a new way of learning. If this way of learning is compatible with her/his natural style of learning, her/his progress is well otherwise she/he does not achieve well.

At times she/he starts feeling alienated. Either she/he gets dropped out or settles down as low achievers. Such children are also led to commit suicide which has resulted in sharp increase in suicide cases among children due to failure in schools. One of the main challenges of education today is to ensure success to all children. Actual inclusive learning should lead to success to all children. APCL has been working for promotion of creativity and creative learning among all children.

Kanka Gajendra Centre for Inclusive Learning has been set up to supplement the efforts to ensure that each child gets exposed the right way of learning as per her/ his natural way of learning.

It also requires proper counselling of parents so that they also take care of children right from the womb. They should also be familiarised with the processes of handling children in case they are not able to perform as per their potential in the schools. Teachers are also required to undergo training to handle the individual learning requirements. The centre aims at fulfilling all these requirements.

Objectives

To help children in realizing their total learning potential.

To provide counselling services to parents, relatives and teachers of children and young people to deal with their specific learning needs.

To train teachers and caregivers in managing special learning needs of children.

Motto

Count ability not disability

Activities

Atal Tinkering Lab

School of Creative Learning has set up Atal Tinkering Laboratory with support from Atal Innovation Mission of NITI Ayog, Govt. of India. This lab provides opportunity for development of creative and innovative abilities among children by providing training in ROBOTICS, SENSOR NETWORK and 3D printing and drones. KGCIL is using this lab to support children with special needs. This has shown to give wonderful result and CWSN children have prepared different innovative projects which has won accolades from all over the country. Recently children having dyslexic problems have prepared a project which has been shortlisted among best 200 project ideas of the country.

Brain Computer Interface

KGCIL is working on Brain Computer Interface Technology for identification and monitoring of learning needs of children. Under the guidance of Dr Prabhat Ranjan, Vice Chancellor, DY Patil International University, Pune it has developed technique to monitor status of concentration and memory which has been used on about two hundred children so far. The technique is quite useful for communication in case of children of paraplegia and quadriplegia. It is being successfully used for persons of different communication problems related to paraplegia and quadriplegia. It is proposed to further develop the technique to support CWSN.
